

BRC's Safety Guidelines Book

Ventolin & Epipen Policy

Scope:

All BCMG events & hires

Content

The BCMG does not supply Asthma Reliever (such as Ventolin) and Adrenaline Autoinjector (such as Epipens) for participants' usage.

Participants that have either a Ventolin or Epipen prescribed to them are required to bring at least 2 in-date Ventolin/Epipens (or as per the participant's management plan) with them to all Chalet events. Should insufficient medication be brought, the participant will not be allowed to attend.

On a Winter Party:

1. The medication must be kept in the top of the participant's pack at all times and must go with the participant on all tours out of the Chalet
2. Epipens & Ventolin are to be visually confirmed by the Party Leader or delegate prior to attendance. If they are not able to be presented, the participant will be refused to board the bus

On a summer event:

1. The medication must be kept in the top of the participant's bag at all times and must go with the participant on all tours out of the Chalet
2. The medication must be confirmed by the PIC or delegate of the event

It is suggested that Snow Venture participants are reminded of this policy prior to the conclusion of the school term as one of their epipens will likely be at school.
